Job opening

Manager

LEAP Education Society

IIT Madras Research Park
Taramani, Chennai

Robotic feeder, GEC Idukki

LEAP fosters team spirit

About LEAP: LEAP provides industry-oriented Project Based Learning to STEM institutes by focussed programs from 1st to final year of BTech/BSc/BCA/MSc/MCA. LEAP was founded by IIT professors and industry veterans. It was incubated in the IIT Madras Incubation Cell with seed funding from the Maker Bhavan Foundation, USA.

In 1st year, LEAP students work in teams to improve existing products. In 2nd year, teams design and build a working prototype to solve a problem of society. These are typically robotic devices for agriculture, healthcare, home/office automation, etc. In the 3rd and 4th years, students explore specific domains in greater depth through mini-projects, internships and major projects. In all LEAP programs, students are guided by their college faculty with help from LEAP experts.

LEAP Faculty Workshop, GRD CS, Coimbatore
